

# Mobile Developer Job Description Template

We are looking for a skilled Mobile Developer with prior developing experience to create and maintain mobile applications for Android, iOS and Windows devices. The Mobile Developer's responsibilities include researching UI and UX trends, updating current applications and working with colleagues to brainstorm innovative ideas for new applications.

To be successful you must combine your knowledge of UI and UX development with insight into the latest technology in mobile applications and use that knowledge to produce high quality applications to the client's specifications in a timely manner

## Key Responsibilities:

- Create and maintain mobile applications for Android and iOS
- Work with computer engineers to brainstorm new applications
- Create UI tests
- Identify and fix any issues identified
- Ensure excellent user experience through app design
- Working as part of a team to ensure projects and tasks are completed in accordance with the projects timetable

## Personal Specification:

- Degree in Computer Science or similar fields
- Previous experience producing applications for Android and iOS devices
- Proficient knowledge of relevant computer languages for Android, iOS and Windows devices
- Ability to multitask
- Excellent interpersonal skills
- Strong verbal and written communication skills
