

# UI UX Designer Job Description Template

We are looking for a dynamic UI/UX Designer who will be responsible for the UX and UI design of our various digital assets. You will ensure all elements of the online user experience are optimised for improved usability, usefulness and exceptional visual design. You will be responsible for the development of UX and UI features, the implementation of newly developed features into various digital packages and the testing of them to ensure there are no faults and to identify any possible changes that could be made to improve the usability of any additional features.

## Key Responsibilities:

- Identify and implement possible improvements to both the UI and UX to improve the product
- Develop comprehensive UI/UX design strategy
- Produce high quality UX design solutions through wireframes, visual and graphic designs
- Design and implement UI elements and tools such for our digital assets.
- Test various implemented UI elements for faults

## Personal Specification:

- Degree in computer science or similar field
- Minimum of 2 years' UI/UX design experience for digital products or services
- A portfolio of professional UI/UX design work for both web and mobile platforms
- Ability to work independently or as part of a team
- Excellent written and verbal communication skills
- Time-management skills
- Experience working on projects with tight deadlines
